

# Identity and Globalization: Ethical Implications

**June 17-18, 2014, Klaipeda, Lithuania**

## Deconstruction has come to mean:

1. Authors adventure in philosophy.
2. What Derrida does, what his followers do
3. Only one term among many which Derrida uses in his early texts to describe his adventure in philosophy.
4. A method or theory of reading [my task: to make it a theory of social research]
5. A school of philosophical investigation
6. Any radical aspects of postmodern critical theory
7. It is what happens in the event of reading, which attempts to open a text or institution to the movement of difference, forgotten within it (McQuillan, 2001)
