17. Theological Department of the Osh State University, Osh.
18. Theological Department of the Humanitarian Institute "Arashan", branch of Osh State University, Arashan village, Alamudin District, Chui oblast.

Some positive shifts in Islamic education in Kyrgyzstan since 2002

First of all is an emergence of Islamic educational institutions which carry out need of a certain part of the population for receiving religious education. It will lead to reduce the number of an uncontrollable Hudzhra and Quranic schools.

Muftiyat under the requirement of State Commission on Religion Affairs of the KR, developed the standard Curriculum for all Islamic educational institutions, despite a dissonance in understanding of that standard by those who gained Islamic education in Tashkent, Bukhara, in the Arab-Muslim countries and in Kyrgyzstan. New Curriculum is really started taking root since September, 2014.

If poorly educated teachers taught in Islamic educational institutions in 2002-2004, now all educational institutions are completed by the graduates having education in Madrasas, Islamic Institutes and Universities. Some of them have PhD degree. Most of them are graduates of the Islamic educational institutions.

Teachers began to write very actively own textbooks literature which has high popularity among the population. It support their everyday existence at the expense of the public literature.

A landscape photograph capturing a vast, open field under a dramatic sky. The upper half of the image is dominated by a deep blue sky filled with wispy, white cirrus clouds. A bright, overexposed area of light is visible in the center-left, suggesting a low-angle sun or a lens flare. In the lower portion of the image, a dark, silhouetted landscape stretches towards a range of mountains in the distance. On the right side, several dark utility poles stand tall, with thin wires extending across the frame. The foreground is a dark, textured field. In the bottom right corner, there is a timestamp in orange text.
